 Name _____

Bad Debts Step by Step: % of Credit Sales Method

Sneaker Supply Co. (a made-up company) sells shoes to stores. It started business on **January 1**, so A/R and ADA begin at $0. Based on experience, it expects **2% of each month's credit sales** to be uncollectible, and it records BDE at the end of each month.

January transactions

- **Jan 5:** Sold shoes for **$4,000 cash**.
- **Jan 10:** Sold shoes to Store A **on credit, $6,000**.
- **Jan 20:** Sold shoes to Store B **on credit, $4,000**.
- **Jan 31:** Record bad debt expense: 2% of January's credit sales.

1. Journal entries for January

Use (+A), (−A), (+R), (+E), (+xA), (−xA).

Date	Account	Debit	Credit
Jan 5	_____	_____	
	_____		_____
Jan 10	_____	_____	
	_____		_____
Jan 20	_____	_____	
	_____		_____
Jan 31	_____	_____	
	_____		_____

2. Accounts receivable at the end of January

Accounts receivable, Jan 31	Amount
Gross A/R	_____
Less: ADA	_____
Net A/R	_____

Cost of goods sold entries are omitted for brevity (see Ch6).

February

February transactions

- **Feb 8:** Sold shoes for **$3,000 cash**.
- **Feb 15:** Sold shoes to Store C **on credit, $5,000**.
- **Feb 20:** Store A went out of business. An amount equal to **1% of January's credit sales** is now deemed uncollectible and is written off.
- **Feb 28:** Record bad debt expense: 2% of February's credit sales.

3. Journal entries for February

Date	Account	Debit	Credit
Feb 8			
Feb 15			
Feb 20			
Feb 28			

4. Accounts receivable at the end of February

Accounts receivable, Feb 28	Amount
Gross A/R	
Less: ADA	
Net A/R	

5. Put it together

a BDE for January = _____ BDE for February = _____

b ADA equation for February: Beginning ADA _____ + BDE _____ − Write-off _____ = Ending ADA _____

c Did the Feb 20 write-off change BDE? yes / no Did it change net A/R? yes / no
